WHAT'S THE MATTER WITH GEORGE SOROS?

It's 1989 in China. The country wakes up to a curious looking crowd of protesters who for some reason are waving American flags. They erect a miniature of the Statue of Liberty in Tiananmen Square. To the naive onlooker, this looks like the Chinese people organically yearning for Americanization. The crowd burn cars, buildings & murder critical onlookers. After several confrontations, local police is overwhelmed. The Chinese military moves in. The country is in chaos.

Three years earlier, in 1986, a $1 million donation was made available in China by an NGO named Fund for the Reform and Opening of China. It was ran by George Soros, and he declared his wish to fund anyone who would lead a color revolution in the country. Color revolution is my rephrasing of what he called the "liberalization" of China.

Two years later, in 1988, the CIA cut-out National Endowment for Democracy opened two offices in China, recruiting & training students. The Soros money & the CIA training lead to the attempted coup in China in 1989.

When the Soros-funded & CIA-trained coupmakers took to the street, the CIA mailed thousands of inflammatory letters to recipients in China, urging as many people as possible to storm the Tiananmen Square.

China succeeded in snuffing out the joint CIA/Soros coup. The only reason is because they were prepared.

You see, they observed this joint CIA/Soros operation take place in countless communist countries throughout the 1980s. It had become somewhat of a routine.

Soros is today a 91 year old Hungarian-American billionaire & an extreme capitalist whose political influence is unmatched by any other billionaire.

He has spent at least, and probably much more than, $32 billion on his NGOs based in 120 countries worldwide.

In 1979, he started an "open societies" project with the aim of demolishing communism worldwide and "opening" communist countries up to free market capitalism.

Many Western intellectuals credit him for the collapse of the Soviet Union.

Listen to him brag about it himself, proudly stating that he replaced the "Soviet Empire" with the "Soros Empire":

When Soros helped collapse the Soviet Union, he caused one of the worst humanitarian disasters Europe had seen since WW2:

- Russian life expectancy fell to depths normally only seen during war time
- Mass poverty broke out
- Rampant criminality
- The complete and total Russian societal collapse

Soros & other US capitalists swept in during the privatization & piratization of Russia and looted the country, earning billions from rigged contracts facilitated by the Yeltsin puppet government. The looting was only disrupted by Vladimir Putin's rise & him expelling the likes of Soros.

When Soros' business ventures were expelled from Russia, he turned his attention towards Ukraine, to destablize Russia all over again.

Boris Yeltsin & George Soros

When the CIA & the State Department orchestrated the 2014 Maidan coup in Ukraine, somehow Soros was in the midst of it too.

His Open Society Foundation had been operating in Ukraine since 1989 and it helped fund the extremist coupmakers there too:

"As a supporter of open society, I am exerting my utmost efforts to support it."

Soros on the 2014 coup

When the coup succeeded, he helped the Obama administration more or less rule Ukraine. During the DC Leaks of 2016 (the same leak that made the Clinton emails available), Soros' communication with Obama officials were made public. It showed how Soros pressured Obama towards a strategy that would force Russia to accept the coup government in Ukraine:

"Obama has been too soft on Putin, and there is a need to impost potent smart sanctions. There is need for a division of labor between the US and the EU with the US playing the bad cop role. The USG should impose sanctions on Russia for 90 days or until the Russian government recognizes the results of the presidential elections."

Again, here too Soros brags publically about his role in destabilizing countries on both his own monetary behalf & on behalf of the US security state. Listen:

I've only mentioned a few examples. Soros have funded countless color revolutions worldwide to monopolize global economy within the hands of a select few US corporate oligarchs. His funds can be found:

- Through out entirety of the Arab spring, including Libya, Egypt, Syria, Tunisia & many more
- He funds anti-communist fascists in Venezuela, Peru, Colombia, Argentina & Bolivia
- Gusanos in Cuba
- Color revolutionists in Kazakhstan
- Separatists in Taiwan
- In total, his NGOs are active in 120 countries with the sole purpose of monopolizing their resources under the pretense of "opening up" to Wall Street

So in 2021, the communist party of China wrote an op-ed declaring Soros both a global terrorist & "the son of satan":

CHINA OFFICIALLY DECLARES GEORGE SOROS A 'GLOBAL TERRORIST' - HE'S 'THE SON OF SATAN'

In 2015, all of his operations in Russia were shut down:

> "It was found that the activity of the Open Society Foundations and the Open Society Institute Assistance Foundation represents a threat to the foundations of the constitutional system of the Russian Federation and the security of the state," a translated version of the press statement read.

George Soros
@georgesoros

I consider Xi Jinping the most dangerous enemy of open societies in the world.

- In America, most criticism of Soros comes from the right because he funds neoliberal projects like the Black Lives Matter organization, which of course turned out to be a dead end movement which only functioned as a tax avoidance scheme & a money funneling operation for the wealthy.

- When you actually look into Soros' life work, he's a rabid anti-communist & an extreme American exceptionalist who should be considered more of a villain on the left than on the right.

- If you're on the right, as some of my followers are, you have to come to one of two conclusions: Either you support Soros' 40 year long war against communism and/or for US world dominance you have to conclude that the man is a force for good OR you have to entertain the idea that communism threatened the hegemony of people like Soros, & perhaps the hegemony of people like Soros should be threatened.
